Silent System Accessory Installation

INSTALLATION INSTRUCTIONS FOR “SILENT SYSTEM” ACCESSORY

ISTRUZIONI MONTAGGIO ACCESSORI - “SILENT SYSTEM”

The “Silent System” accessory is designed to replace the initial portion of the exhaust duct with a sound-insulated duct.

INSTALLATION INSTRUCTIONS:

- 1.) Align one end of the Silent System with the duct output of the blower.
- 2.) Seal the connection between the Silent System and the blower output with silver tape (aluminum tape). Do NOT use duct tape.
- 3.) Route the Silent System as appropriate for your specific installation (upward through the chimney, angled into the wall, etc).
- 4.) Align the far end of the Silent System with the beginning of the rigid duct.
- 5.) Seal the connection between the Silent System and the duct with silver tape.

Optional: if desired, additional sound insulation (rubber foam, Styrofoam, etc) may be placed around the blower chamber (white plastic box).
